WEATHER OF CONCERN

NORTHERN CALIFORNIA

- Fire Weather Watch for abundant lightning on dry fuels Friday afternoon through evening for portions of Modoc, Siskiyou, and Shasta Counties.
- Excessive Heat Warning in effect through late night Saturday for portions of Siskiyou County.
 - The Shasta Valley, Scott Valley, and Klamath River Valleys. This includes Weed, Happy Camp, Mt. Shasta, and Fort Jones.
- Wildfire smoke from the Dixie fire and other area wildfires west of the Sierra will continue to produce smoke and haze for much of northern California. In addition, temperatures will be around 100 degrees for many of the hotter valleys and close to 90 degrees in Sierra communities.
 - Several days of heat along with the smoke may exacerbate heat health symptoms.
 - Air quality impacts will likely persist along with elevated heat impacts.
 - Get current and forecast Air Quality for your area on AirNow.gov.
- Hazardous air quality conditions are expected in and around Weaverville and Lewiston in Trinity County is expected to last through Thursday.
- For persons in Del Norte, Humboldt, and Trinity Counties visit the [North Coast Unified Air Quality Management District website](#) to access the current air quality alert and additional advisories and air quality information.

SOUTHERN CALIFORNIA

- [Multiple Excessive Heat Watches have been issued from Saturday morning through Monday evening for portions of San Bernardino, Los Angeles, Santa Barbara, San Luis Obispo, Kings and Kern Counties.](#)

WEATHER KEY POINTS

08/12/21 - 08/18/21

Thursday-Wednesday

- Heat builds over much of interior southern California, the Central Valley, and northern valleys through the weekend
 - Moderate to locally high heat risk impacts will become increasingly likely for interior areas of the state through the week
 - Note that temperatures closer to the coast will remain much cooler as winds remain onshore most days
- Fire weather conditions remain locally elevated most afternoons and evenings across the foothills and mountains where winds will occasionally gust 25 to 30 mph, though widespread strong winds are not expected over the next 7 days
- Scattered monsoon thunderstorms are possible across the mountains of much of the state through at least the weekend, including interior portions of southern California, the Sierras, and mountains of far northern California
 - Lightning could pose a risk for some new fire starts Thursday through Saturday, especially over the Sierra and northeast California where any storms are less likely to produce locally heavier precipitation, **with the greatest coverage of storms currently expected on Friday**
 - Gusty thunderstorm winds could also contribute to fire spread
- Periods of thicker wildfire smoke will persist across northern and central California through the week, bringing reduced visibility and air quality at times. Thicker smoke may also lead to locally cooler temperatures at times.
